EDUCATION

Queens University, Belfast

Sept 2015 - Present

B.Eng in Software Development (Year 2 - Direct Entry) Android and C+++ Programming May 2016 TBD Networks and Communications TBD Jan 2015 Database Systems Jan 2015 TBD Professional Computing Practice Jan 2015 TBD Data Algorithms and Structures May 2016 TBD

North West Regional College, Derry/Londonderry

Sept 2013 - May 2015

Foundation Degree in Computing and Software Development

Distinction grade awarded by University of Ulster

Sept 2011 - June 2013

Limavady Grammar School, Limavady A-Levels in Computing (C), Engineering (C) and Mathematics (E)

GCSEs including Mathematics (A), ICT (A), Technology and Design (B), English (C)

EXPERIENCE

North West Regional College

March 2015 - July 2015

L'Derry

Full Stack Developer

- · Microsoft Full Stack development using ASP.NET C#, MS SQL, JavaScript, HTML and LESS.
- · Successfully implemented various projects including a project management dashboard for admins and general staff, as well as a KPI reporting application for executives and management staff.
- · Frequently worked with other team members, giving and receiving help with various issues.
- · Assisted and managed a small meeting on web technologies and gave a demo presentation to an executive on my KPI application.
- · Advised the team on future web technologies and helped clarify any questions they had.

geopii.

August 2012 - August 2012

Programming Work Experience

Coleraine

- · Experienced my first interaction with JavaScript and performance testing.
- · Developed a simple web version of tic-tac-toe.

DriveSafe Charity
Filming and Editing

July 2014 - October 2014

Dungiven

Limavady Printing Company

January 2012 - January 2012

Design Work Experience

Limavady

TECHNICAL SKILLS

Programming C#, C++, Java, JavaScript and SQL.

Other XML, HTML, CSS and LESS.

Operating Systems GNU/Linux (Primarily), Windows and minor experience in OS X

Tools Atom, Intellia, Grunt, Git, npm, SQL Server, Vim and Visual Studi

Tools Atom, IntelliJ, Grunt, Git, npm, SQL Server, Vim and Visual Studio.

Hardware As a hobby, I have built computers for friends, family and myself.

Genesis Distributions

C# WPF

- · Arranged and coordinated a weekly development plan for our team.
- · Planned and implemented the application UX and design framework.
- · Developed various searching and filtering functions for customers and orders, as well as complex systems for placing orders.
- · Used my knowledge and previous C# experiences to lead the development and assist the team with any issues.
- · Personally setup a private git repository for the team to use as a version control system.

NWRC KPI Reporting Application

ASP.NET C# & Web

- · Organised various talks to decide on the application design.
- · Successfully implemented a design after various discussions with the product owner.
- · Developed a small script that imitated "Metro live tiles", displaying twitter feeds and the company blog.
- · Worked together with my manager to build a front-end for their complex SQL queries.
- · Successfully implemented the finished solution that was deployed onto their intranet.

Zombie Defence Android Game (Java)

- · Organised first group meeting in order to initiate the project.
- · Assisted brainstorming for the game idea and proposed different ideas.
- · Used my initiative to refresh my Android and Java knowledge by creating a simple game with multitouch.

INTERESTS & HOBBIES

Technology

I always try to keep up to date with the latest news regarding anything technology based and how companies are advancing the technology they use in the modern world. I also enjoy reading up on security risks to analyse them and follow how they are being combated.

A few years ago GNU/Linux started to interest me, but it's only in the last few months that I have dove in and made the switch. As well as being a much more pleasant development environment in my opinion, the move has also made me more interested in open source software.

Programming

Ever since I started learning Pascal in the first year of my A2 Computing course, my interests in programming and development have flourished and expanded into various different areas. Moving forward, I encouraged myself to learn C# both ASP and WPF, and JavaScript including AngularJS and NodeJS. Using the knowledge I had gained, I went on to successfully create some applications in my spare time. (Which can be seen on my website)

At the present time, I've got a passion for web applications and a variety of security solutions, which I hope to delve deeper into in the future.

Sport

As a football fan, throughout my life I have always followed a team, watching them any week I could. When the opportunity presented itself to go overseas and see the action in real life I couldn't resist, since then I've been over to Liverpool twice.
